*Hay, tratándose del Retiro, un problema importante que resolver, una vez expropiado el Patrimonio: por todas partes es posible y fácil extender la animación y la vida fuera de Madrid, menos por esa larga tapia llamada Ronda de Vallecas y de Alcalá, en que termina el Retiro, formando de aquellos parajes un lugar solitario y peligroso para la seguridad personal, aún a mitad del día. Basta observar la multitud de casetas de resguardo que hubo necesidad de establecer a lo largo de esas Rondas para convencerse de la necesidad que aquello tiene de una transformación.*

Ángel Fernández de los Ríos, 1868.
